One exhibit of extracted honey is defined as three (3) identical one-pound jars, as specified in rule #17 under the General Rules of the Honey Show. Closures may be of metal or plastic. Tamper-proof seals are strictly prohibited; any exhibits submitted with any tamper-proof seal(s) will be severely penalized. Judges evaluate entries on the following: confirmation with the criteria set forth herein; cleanliness of the jar and lid; correct fill level; uniformity of the jars that comprise the exhibit; cleanliness and clarity of the honey; moisture content (only if needed); and aroma and flavor (for off aromas or flavors). *See Appendix hereafter for notes on correct jars and fill level.

The Exhibitor shall place one ID label, as provided by the honey show Secretary, on each of the jars comprising the exhibit. The labels should be affixed at the front, bottom, center of each jar, approximately ½ inch from the bottom of the jar.

H2: INFUSED EXTRACTED HONEY

An exhibit consists of three (3) identical one-pound jars, as specified in rule #17 under the General Rules of the Honey Show, of extracted honey which has been infused with one or more added flavors and/or aromas. The judging criteria for this category are the same as that for H1 (Extracted Honey), with the exception that the use of infusing agents is permitted. The infusing agent(s) should be removed from the honey, and the honey should be free of all visible inclusions and debris. Judges evaluate entries on the following: confirmation with the criteria set forth herein; cleanliness of the jar and lid; correct fill level; cleanliness and clarity of the honey; moisture content (only if needed); aroma; flavor; potency; balance; and finish. *A white card with a description of the flavoring(s) added to the honey must accompany each exhibit. *See Appendix hereafter for notes on correct jars and fill level. The Exhibitor shall place one ID label, as provided by the honey show Secretary, on the exhibit. The label should be affixed at the front, bottom, center of the jar, approximately ½ inch from the bottom of the jar. An ID label should also be affixed to the white card accompanying the exhibit.

Creamed or Soft Set honey is honey that has been subjected to a manual or mechanical process to assist and control the otherwise natural process of granulation. An entry of creamed honey is three (3) identical wide-mouth jars, no less than eight ounces (8oz.), nor more than sixteen ounces (16oz.) in net weight. Creamed honey must be displayed in identical, clear, straight-sided, glass jars with one-piece lids. Judges evaluate entries on the following: confirmation with the criteria set forth herein;

cleanliness of the jar and lid; correct fill level; cleanliness and purity of the honey; uniformity of product within the jar; fineness of crystals; appropriate set or firmness (should be spreadable but not runny); freedom from foam, frosting, or visible moisture; striation, or colors; uniformity of the jars that comprise the exhibit; aroma and flavor (for off aromas or flavors); and moisture content (only if in question).

The chunk of comb must be in one piece, of uniform thickness, and with a straight mid rib. Virgin comb with this year's wax is preferred. All wax foundation should be unwired, thin surplus. The cuts should be clean and uniform. The chunk comb should be cut and sized to appropriately fit the container. The honey should fill the rest of the jar to the correct fill line. The comb should be oriented in the container as found naturally in the hive. Comb with watery cappings should be avoided. The comb should extend the length of the jar. The chunk of comb should account for at least fifty percent (50%) of the internal volume of the jar. Judges evaluate entries on the following: confirmation with the criteria set forth herein; cleanliness of the jar and lid; correct fill level; uniformity of the jars that comprise the entry; cleanliness and clarity of the honey; absence of pollen, brood, uncapped cells, "wet" or "watery" cappings, or travel stains on the cappings; freedom from granulation; absence of floating wax debris in, or on the surface of, the honey; moisture content (only if needed); and aroma and flavor (for off aromas or flavors).

BEVERAGES MADE WITH HONEY

PLEASE READ CAREFULLY: Exhibitors should be aware and keep in mind; this is a honey show. These beverage & culinary categories have been specifically chosen because of their ability to showcase honey as an ingredient. The influence and impact of honey on the finished product will be the first, and ultimate, factor the judges will consider when making final awards. The stronger and more pronounced the flavor and aroma of honey is in the finished product, the greater the preference that exhibit will receive from the judges. Conversely, an exhibit of otherwise exceptional quality that does not taste or smell profoundly of honey, will not be placed highly despite the presence of other exceptional qualities.

Appendix

Notes on Correct Fill Level:

- The correct fill level on honey entries is at the top of the fill ring of the jar, without going over.
- The fill ring is the raised ridge, or ring of glass, immediately above the shoulder of the jar and below the threads. It can be distinguished from the threads in two ways:
 - a) the fill ring forms a complete circle, without ends; and**
 - b) the fill ring will be completely parallel with the bottom and top of the jar.**
- Liquid honey in a circular shape forms a concave surface sometimes referred to as a meniscus. For the purpose of filling jars, the edge of the meniscus should clearly be at the top of the fill ring, without going over.
